companythis pdf document

provides a comprehensive

collection of detail drawings for

steel stud framing systems

including walls floors ceilings

roofs and more learn how to

use ssma products to create

efficient and durable structures

installation guide and

detailing options for

compliance with introduction

the fair housing accessibility

guidelines the guidelines do not require that grab bars be installed in bathrooms however the guidelines do require that bathroom walls be sufficiently strong to allow for later installation of grab bars for resident use

design for splicing of cold

formed steel wall connection

figure 1 below shows a typical

wall detail with spliced studs in

this case the studs used to

construct the wall are standard

12 foot long members while the

required wall height is 15 feet

therefore the contractor is

required to extend the

members 3 feet by splicing

additional stud sections to the

12 foot members

ssma framing details scafco

the application and detail

drawings in this manual are

strictly for illustration purposes

and may not be applicable to

all building designs or product

installations all projects should

conform to applicable building

codes for that particular area it

is recommended to follow all

building regulations and
