49055519 link protection is

available for both paid and trial

subscriptions note that the

barracuda email security

service maintains a list of

exempted domains for link

protection see anti fraud and

anti phishing protection for

more information on link

protection and typosquatting

malicious url detection

using machine learning a

survey this allows you to send

users direct links to a

document and avoid having

them navigate through a folder

hierarchy such as in bi launch

pad the opendocument syntax

and its parameters allow you to

construct urls that link to these

documents for example

consider the following url

[urltran improving phishing url](#)

[detection using url detection](#)

over a wide range of very low

false positive rates fprs

compared to other deep

learning based methods for

exam ple urltran yields a true

positive rate tpr of 86 80

compared to 71 20 for the next

best baseline at an fpr of 0 01

resulting in a relative

improvement of over 21 9

further we consider some

[reference guide apa style url](#)
