

# Url

*European Employment Observatory Review 1909* In this work we use structural analysis of semantic graphs of categories and URLs to find clusters of URLs, which belong to more than one predefined categories. All the present manual as well as automatic classifiers give a deeply rooted and complex category structure, which is unusable for classification of sets of personal URLs. We have developed software which, given a set of URLs and their set of predefined categories, tries to find sets of personalized categories for a user using the properties of Bipartite URL-Category Semantic (BUCS) network. The structural analysis of this network shows that biconnected components in this graph contain sets of nodes which represent new and refined categories derived from the given hierarchical structure of categories. Also the sets of URLs in these biconnected components represent a more general topic formed by the interrelated individual subjects of their web pages. These sets of URLs are the personalized web communities bound by strong underlying structure of biconnected components in a semantic network of categories and URLs. These refined categories and personalized web communities can be used as part of user's 'Personalized Information Environment.'

*Industrial Relations Developments in Europe 2006-07*

*Employment Policies in the EU and in the Member States 2022-03-28* This is a new and updated version of the highly successful book *Medicine and the Internet* (OUP 1995). Specially designed for anyone in the medical professions who would like to get started on the internet, or to use it more effectively, this edition contains new chapters on the internet's role in telemedicine and on how to become an internet provider yourself.

*Early Warning System for Identifying Declining Tourist Destinations, and Preventive Best Practices 1966-11*

**Official Journal of the European Communities 1991-03**

**Contextual Decomposition of Web Resources 2005-03** Corporate strategies are nowadays considered critical in the promotion of gender equality in the workplace. Promoting an equality sensitive approach in human resource management is still a major challenge for companies and policy-makers. This report describes the operation of workplace gender equality strategies in seven countries of the European Union and assesses their impact on both employees and the organisation. It explains the reasons for the success or failure of these programmes and draws up recommendations for action aimed at providing decision makers with the relevant information they need in order to give an impetus to gender equality in the workplace. *Broad Guidelines of the Economic Policies ... 2016-04-10* The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

*Dirty War, Clean Hands 2004* About the book: Web applications are the essential component of human life. People carry out various operations including e-commerce and online banking. The web security is a major issue in the current scenario. So it is essential to detect the malicious URLs of the phishing website. It is a light weight approach and prevents the user from those websites. This survey analyzes various malicious URL detection methods and provides a road map for new research in this area. This research work gives an insight about malicious URL detection. About the author: Dr. N. Jayakanthan is an innovative teaching professional who strongly believes in being a catalyst in the learning process. He has 20 years of teaching, 10 years of research and 3 years of industrial experience. He holds a doctoral degree in Computer Applications from Bharathiar University, Coimbatore. He has strong knowledge of subject areas in Computer Science combined with a broad subject background. Well versed in teaching subjects like Data Structures, Algorithms, Unix/Linux, Software Testing, Networking, Python, C, C++, XML, C#, .Net, Java.

*Choosing to Grow 1996* In this meticulously researched study of Basque boardinghouses in the United States, Jeronima Echeverria offers a compelling history of the institution that most deeply shaped Basque immigrant life and served as the center of Basque communities throughout the West. She weaves into her narrative the stories of the boarding house owners and operators and the ways they made their establishments a home away from home for their fellow compatriots, as well as the stories of the young Basques who left the security of their beloved homeland to find work in the United States.

**Development of VHF/UHF Wind Profilers and Vertical Sounders for Use in European Observing Systems 2008**

*Woven Stories 2002* COST Action 76 aimed at making all preparations necessary for the future deployment of an operational wind profiler network in Europe. Thirteen countries participated in this action, coordinating the activities of European meteorological offices, universities, research institutes and industry. The main objectives of the project were: - to complete actions on radio frequency allocation, technological development and operational deployment of wind profiler radars in Europe; - to evaluate the usefulness of upper-air measurements at high temporal resolution for meteorological operations and scientific research in Europe; - to investigate benefits from the use of vertical sounding systems for other meteorological variables in association with wind profiler radars. The action was organized in three working groups and was coordinated by a management committee. In general the objectives were met. An important result was the establishment of a semi-operational European wind profiler network. To disseminate results, workshops were organized at Engelberg in 1997 and, together with the MST9 workshop, in Toulouse in 2000. With the intention to give this final report the character of a handbook on wind profilers, chapters on the technique of wind profilers, on other ground-based remote-sensing techniques and on the role of wind profilers in observing systems were written.

**Construction Industry 1999-11-01** With some 70 percent of its surface covered by water, the Earth presents a picture of a gemlike blue planet when viewed from outer space. This sapphire jewel — the only planet in our solar system to sustain intelligent life — is the subject of this remarkably engaging and concise book by biologist, teacher, and popular science writer Url Lanham. Focusing on the Earth and the life forms that have evolved on it, Mr. Lanham's captivating study covers a wide range of subjects — from the work of Galileo, Copernicus, Herschel, and other scientists who contributed to our knowledge of Earth's position in the universe, to the Earth's internal physiology, intricacies of the biosphere, creation of continents, origins of plant and animal life, the diversity of physical habitats in which these life forms thrive, and much more. Well written and highly readable, this absorbing and optimistic natural history of the planet will take readers on a fantastic journey through time, offering up a host of facts and provocative insights. Easily accessible to advanced high school science students and college undergraduates, *Earth, the Sapphire Planet* will be warmly received as well by teachers and ecologically aware general readers.

**Bulletin of the European Union 2000** An investigation into the specifics of Basque migrations, cultural representations, diasporic politics, and ethnonationalism, using theories from sociology, political science, history, and anthropology. Distributed for the Center for Basque Studies.

**Promoting Gender Equality in the Workplace 2004** Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

**Performance of the European Union Labour Market 2001** Malicious URL detection is an important task in Internet security intelligence. Existing works rely on inspecting web page content and URL text to determine whether a URL is malicious or not. There are a lot of new malicious URLs

emerging on the web every day, which make it inefficient and not scalable to scan URL one by one using traditional methods. In this thesis, we harness the power of big data to detect unknown malicious URLs based on known ones with the help of Internet access logs. Using our method, we can find out not only related malicious URLs, but also possibly infected devices. We also discuss how to scale up our method on huge data sets, up to hundreds of gigabytes in our experiment. Our extensive empirical study using the real data sets from Fortinet, a leader in Internet security industry, shows the effectiveness and efficiency of our method.

**Life of Commodore Thomas Macdonough, U. S. Navy** 1999 Andrea Heckman beautifully illustrates how the Quechua people of southern Peru tell their cultural stories in their textiles and use their weaving in centuries-old ceremonies, sustaining a connection to the past.

*The Directory of EU Information Sources* 2003 "Shows that precolumbian tectonic forms (especially as found in sculpture and weaving) appear to be an overlooked source, or anticipation, of much of the art of the 20th century. Second part of book deals with artifacts as American art and addresses reception of ancient tectonics in the 20th century. Emphasizes intense relationship that some members of the New York School (particularly Barnett Newman and Adolph Gottlieb) had during 1940s with the aboriginal arts of the North American part of the hemisphere and thus the affinities between their work and the work of the older Torres Garc a in Montevideo, at the other end of the continent"--Handbook of Latin American Studies, v. 58.
