gutter details

reinforced walls for grab bars hud user

connection figure 1 below shows a typical wall
detail with spliced studs in this case the studs
used to construct the wall are standard 12 foot
long members while the required wall height is
15 feet therefore the contractor is required to
extend the members 3 feet by splicing additional
stud sections to the 12 foot members

introduction the fair housing accessibility
guidelines the guidelines do not require that
grab bars be installed in bathrooms however the
guidelines do require that bathroom walls be
sufficiently strong to allow for later installation
of grab bars for resident use
