*installation guide and detailing options for  
compliance with* connection figure 1 below  
shows a typical wall detail with spliced studs in  
this case the studs used to construct the wall  
are standard 12 foot long members while the  
required wall height is 15 feet therefore the  
contractor is required to extend the members 3  
feet by splicing additional stud sections to the  
12 foot members

**brick masonry details sills and soffits**  
introduction the fair housing accessibility  
guidelines the guidelines do not require that  
grab bars be installed in bathrooms however  
the guidelines do require that bathroom walls  
be sufficiently strong to allow for later  
installation of grab bars for resident use

*classic rib install guide metal sales scafco* framing details is a comprehensive pdf guide that provides cold formed steel framing solutions for various construction scenarios it covers topics such as wall floor roof ceiling and stair framing as well as fire sound and thermal ratings download the pdf and explore the benefits of cold formed steel framing with scafco
