the steel framing alliance have  
worked cooperatively to  
introduce cold formed

## uniform standard

## specifications and details

**for public works** lintel types s

t r uctural steel shapes are com

monly used to span openings in

brick masonry steel angles are

the simplest shapes and are

suitable for openings up to 8

feet wide where superimposed

loads are no more than 5 000

pounds per lineal foot for wider

openings or heavier loads steel

beams with suspended plates

can be used figure 4

standard details of construction

nyc gov to the typical stepped

footing detail on the structural

drawing and footing elevations

on the plan view the exact

horizontal location of these

steps however is not given in

this case the detailer makes an

assumption shows the

dimensions on the elevations

see elevation 2 2 circles same

and adds a note asking the

engineer to verify

## typical deck details civicplus
