classic rib install guide metal sales hybrid wood  
and steel details builder s guide preface the  
nahb research center the u s department of  
housing and urban development hud and the  
steel framing alliance have worked  
cooperatively to introduce cold formed  
details and detailing of concrete reinforcement  
aci 315 to the typical stepped footing detail on  
the structural drawing and footing elevations  
on the plan view the exact horizontal location of  
these steps however is not given in this case  
the detailer makes an assumption shows the  
dimensions on the elevations see elevation 2 2  
circles same and adds a note asking the  
engineer to verify

connection figure 1 below shows a typical wall  
detail with spliced studs in this case the studs  
used to construct the wall are standard 12 foot  
long members while the required wall height is  
15 feet therefore the contractor is required to  
extend the members 3 feet by splicing  
additional stud sections to the 12 foot members
